

PRD Template

PRD Readiness Score: ____ %

Engineering Intake Status:

- ☐ Accepted
- ☐ Returned

Document status	DRAFT
MP name/description	CP name/description
Document owner (PO)	<Name>
BRD signed off?	Y/N
EngineeringManager	<Name>
TechnicalArchitect	<Name>
Business Unit built for ? [2W-Dom, 3W-Dom, 2W-IB, 3W-IB]	<2W - Dom>
Is extensible to other BU?	<Yes/No>

Problem Definition

1.1 Problem statement

-  Describe the current business problem, user pain points, and operational impact.

1.2 Business Impact

-  Explain how the problem affects revenue, efficiency, customer experience, or operations.

Product Objective

-  A 2-4 sentence summary of what this PRD covers and why it exists

User Personas

- 

Mention different users who would be involved

Customer Journey Summary

Describe the current flow vs the proposed new flow.

- i** Mention high level customer journey with a flow diagram, illustrative example
Also add figma mocks

Assumptions Made

- i** Many delivery delays happen due to hidden assumptions. Do add assumptions made

Platform Capability Check

- i** Check **Whether the proposed feature already exists somewhere**
Check **Whether the feature should reuse existing platform services**

Capability	Existing Platform	Reuse/new	Action
Ex - Payments	Yes	Reuse	Extend CPG Service
Ex - Notification	Yes	Reuse	Use Notification Service

System Interaction Overview

- i** Different system context coming into effect for this feature

System	Interaction	Comments
--------	-------------	----------

Ex - Dealer Service	Fetch dealer details	
Ex - Payment Service	Capture payment	
Ex - Notification Platform	Send booking confirmation	

Functional Requirements

i Mention the high level requirements in below format. Also follow

P0 - Must Haves, P1 - Important , P2 - Good to Have

E – Existing Feature (no engineering change)

M – Modification of existing feature

N – New feature development

D – Decommission / Removal

UC#	Change Type (E M N D)	Type	Feature Requirement	Description	Channel	Acceptance Criteria	Priority
1	E	ordering/cancellation/record ing	[Customer] As a user,		website		P0
2	N		[Dealer] As a dealer, ...		DMS		P0

Edge Cases and Exception Handling

i Add failure scenarios and edge cases

UC#	Category	Feature Requirement	Description	Acceptance Criteria	Priority

Out of Scope

Clearly define **features, flows, integrations, or capabilities that are intentionally NOT part of this release.**

Item	Explanation
Example 1 - Dealer inventory optimization	Not included in this phase
Example 2 - Booking multiple EV	Handling not required in D2c

Non Functional Requirement

Add details such as mobile-responsiveness, load & throughput

Scale assumption

Parameter	Value
Daily users	XX k
Peak traffic	YY k
Growth assumption	3 times

Performance

Metric	Target
API Latency	< 300 ms
Page Load	< 2 sec
Throughput	XX TPS

Reliability Expectations

Metric	Target
Availability	≥ 99.9%
Retry behaviour	Yes

Security

Control	Requirement
SAST	Enabled
DAST	Enabled
VAPT	Completed before release
OWASP Compliance	Mandatory

Dependencies

i Add all known dependencies such as upstream, downstream, integrations required

S.No	Dependent Service	PO	Support work required (Y/N)	PO Aligned on requirement? (Y/N)	Budget Required? (Y/N)
1	Ex - Booking service, payment service	Prakash, Vikas			

Release Scope - rollout plan

Release	Features	
Phase 1	Ex - release SPD - all TVS vechiles	
Phase 2	Ex - release SPD - Norton	
Future roadmap		

Success Criteria

 Add quantifiable success metrics

Metrics/Dashboard Required

1. Data Engineering

 Capture what all metrics required to be captured in DL

2. Data Governance

 Capture the data constraint/specs to be followed as per DQ guidelines

3. Next Phases Planned

 Add the future phase/use cases/extension plan

UI/UX screenshots/links

 Add screenshots or figma link

Any AI usecase planned?

 Add AI/GenAI usecases/plan/roadmap if any

Open Questions

-  Add all open points, and to be closed with business/product

Appendix

-  Add context/glossary/data to support more details to the requirement such as HLD/architecture links

Glossary

-  Add acronyms, abbreviations used in the requirement doc
